

GREENLIGHT REPORTING FORM

Fill one form per facility and mail or fax it to V. Berrutto, European Commission JRC-IES, TP450
I-21020 Ispra, Tel. +39 0332 78 9688, Fax +39 0332 78 9992, E-mail vincent.berrutto@cec.eu.int

Facility			Main type of facility	
Name			Total area owned or on long term lessee (in m ²)	
Street			Floor area upgraded (in m ²)	
Street Number	PO Box	Postal Code	Date of the upgrade	
Town/City		Country	Baseline lighting concerns	

	Baseline Lighting ¹			Post-Installation Lighting ¹		
	Luminaire 1	Luminaire 2	Luminaire 3	Luminaire 1	Luminaire 2	Luminaire 3
Location						
Nb. of luminaires						
Nb. of lamps per luminaire						
Type of lamp						
Luminaire total power ²						
Type of ballast						
Luminaire reflector						
Type of control system	(tick below)	(tick below)	(tick below)	(tick below)	(tick below)	(tick below)
General manual switch						
Localised manual switch						
Occupancy linking						
Time scheduling						
Daylighting responsive						
Other (specify below)						
Other savings measures	(tick below)	(tick below)	(tick below)	(tick below)	(tick below)	(tick below)
Delamping						
Localised lighting						
Raising users' awareness						
Tuning of lighting control system						
Regular maintenance plan						
Other (specify below)						
Yearly burning hours						
Synthesis Baseline Lighting			Synthesis Post-installation Lighting			
Total lighting installed power (in W)						
Lighting electricity use per year (in kWh/year)						
Initial cost (including equipment & installation)						
Yearly running cost						
Benefits of Post-installation Lighting versus Baseline Lighting						
Lighting electricity savings per year (in kWh/year)						
Savings in running cost per year						
Compared to baseline, lighting quality of post-installation is						
Payback Time (in years)						
or Internal Rate of Return (in %, over 15 years)						
or Net Present Value ³

1. If you upgrade an existing lighting, the "baseline lighting" is the existing lighting before the upgrade. The "post-installation lighting" is the lighting after the upgrade. If you design a new lighting, the "baseline lighting" is the conventional lighting to which the chosen energy-efficient lighting has been compared. The "post-installation lighting" is the lighting chosen and installed.
 2. In Watts, including lamps and connecting devices
 3. For NPV, indicate number of years and discount rate considered
